COMMANDER'S ATTENTION

Distribute this guide to all officers and NCOs having enlisted personnel of MOS 43M under their command or supervision.

The trainer's guide is designed to provide the commander, senior non-commissioned officer, and unit trainer some of the information required to plan, conduct, and evaluate training for a particular MOS. The guide lists all critical tasks found in the soldier's manual for the MOS. It references primary training materials required for each task and indicates the locations for "qualification" and "additional" training. It also contains appendixes listing consolidated training references and devices required to conduct and evaluate training.

The trainer's guide was prepared by the USA Quartermaster School.

HARRY L. DUKES, JR.
Major General, USA
Commandant

The SQT Notice and Job Site Component (SNJSC) booklets will be sent to your unit 60 to 90 days before the SQT date. It is your responsibility to make sure the booklets are distributed to each soldier in the MOS as soon as the booklets arrive.

Digitized by Google

FOR THE RESERVE COMPONENT COMMANDER

The information on this page is for you, the Reserve Component Commander. Although this manual lists the critical tasks to be performed by the Active Army soldier in his MOS on equipment available in the Active Army inventory, most tasks in this manual are applicable to reservists without changes. However, some tasks may require modification because of differences of equipment, facilities, and training time available. Because of these differences, you as a Reserve Component Commander, will need to be innovative and seek ways to enable your soldiers to accomplish their critical tasks.

The SQT Notice and Job Site Component (SNJSC) booklets will be sent to your unit 60 to 90 days before the SQT date. It is your responsibility to make sure the booklets are distributed to each soldier in the MOS as soon as the booklets arrive.

CHAPTER 1
INTRODUCTION

PURPOSE. This guide has been developed to help you train, evaluate, and guide the MOS 43M soldiers in your command. You are responsible for all phases of training. Try to give your personnel the type of training that will not only challenge them but also prepare them to work in MOS 43M. Develop comprehensive training programs and keep yourself up to date on the best training concepts and techniques. Remember, how well your unit does when it is evaluated in its ARTEP depends on how well personnel under your supervision can do their jobs. Finally, get to know your 43M personnel so you can advise and counsel them on their careers and their specific training needs and problems.

ENLISTED PERSONNEL MANAGEMENT SYSTEM (EPMS). Your 43M trainer's guide is one byproduct of EPMS. EPMS has been designed to eliminate promotion bottlenecks within the MOSs and allow fair promotion opportunities within the pay grades of each MOS. The concept of EPMS originated in the fall of 1973 when the Army experienced grade imbalances within many of its career management fields (CMFs). This led to the development of five basic objectives that EPMS has as goals. They are:

a. Allow the commander to requisition replacements with greater assurance that the requisitions will be filled with soldiers who have appropriate rank for the job.

b. Alleviate MOS mismatch and help the soldiers see their Army career in the right perspective.

c. Provide the training and education a soldier needs in order to have the kind of career he or she wants.

d. Establish procedures for soldiers to prove their qualifications through job performance.

e. Allow the soldier a better opportunity for promotion by structuring each MOS and CMF to eliminate promotion bottlenecks.

TRAINING, EVALUATION, CLASSIFICATION, AND PROMOTION UNDER EPMS. EPMS accomplishes these objectives by integrating training, evaluation, classification, and promotion systems under one program. The EPMS career ladder (page 1-2) shows the relationship of these systems within the EPMS program. The right side of the ladder shows the training available.

Basic Training (BT) will be given at an Army Training Center. Individual MOS training will be given at the proponent service school. The middle portion of the ladder depicts the skill levels and corresponding pay grades. The left side of the ladder shows the specific Skill Qualification Test (SQT) and the pay grade at which it will be administered.

SKILL AND TRAINING PROGRESSION FOR MOS 43M, FABRIC REPAIR SPECIALIST. The 43M10 will receive initial individual MOS training at the US Army Quartermaster School, Fort Lee, Virginia. The Quartermaster School will also train 43M3 technical tasks in a Basic Technical Course. A 43M40 (E7) becomes a 57E50 when he is promoted to grade E8. A 57E50 (E8) who has performed well on his SQTs and received good evaluations may be selected by Department of the Army to attend a Senior Technical Course at Fort Lee. This course will train him for the duties of the Senior Supply Sergeant, MOS 76Z, at grade E9. He may also be selected by the Department of Army to attend the Sergeant's Major Academy at Fort Bliss, Tex. The academy will train him in the duties of a Command Sergeant Major. Page 1-4 shows MOS progression for 43M, Fabric Repair Specialist.

43M SOLDIER'S MANUAL. The soldier's manual for MOS 43M that has been produced is FM 10-43M. This manual is the basis for individual training and evaluation of your personnel. The manual lists by skill level the critical performance tasks soldiers must be able to master. The manual is used as the basis for the Skill Qualification Test (SQT) that your personnel must pass at each skill level. You should use this manual in planning your training programs.

HOW THIS TRAINER'S GUIDE IS ARRANGED. This guide has three chapters. Chapter 1 contains the introduction. Chapter 2 lists the common technical tasks. Chapter 3 lists duty position tasks for each skill level. The format is the same in both chapters 2 and 3.

a. *Task Number.* The task number for duty position technical tasks only gives the following information.

(1) The first group of three numbers (101) identifies the Quartermaster School.

(2) The second group of three numbers identifies a specific MOS within a career management field (CMF); 513 is 43M.

(3) The last group of four numbers is assigned as follows:

- The first digit identifies the skill level.
- The second digit identifies a general subject or technical task.
- The last two digits are assigned by the training development agency to number the task in a specific category.

b. *Task Description.* The title of each task is stated and describes the task action required.

c. *Primary Training Materials.* This section lists the publications that should be on hand for you and your personnel in MOS 43M to use. These publications include ARs, TMs, FMs, TCs, and DA Pamphlets.

d. *Initial Training Level.* This column gives the skill level of initial training for your personnel.

e. *Responsibility for Training (Institution--Unit).* This section tells where and how each task is taught and whether the training is needed for qualification (Q) or if the training is additional (A). For each task that is taught at the school, the specific course is identified. The primary leadership course was developed by the US Army Institute of Administration and is NOT taught at the Quartermaster School. It is taught by the NCO academies or unit or installation schools. If a task is not taught through a

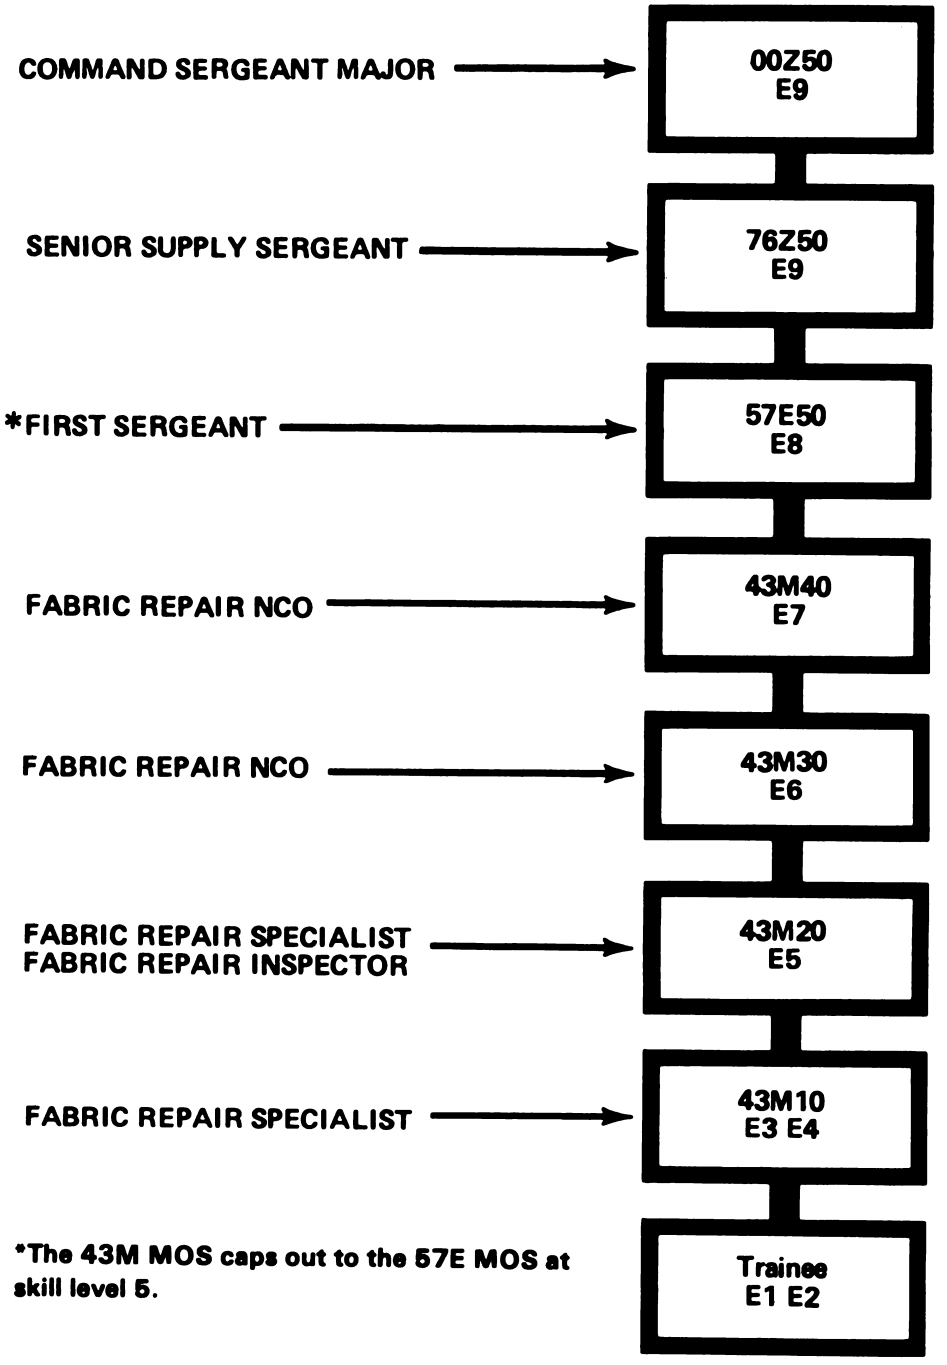
FABRIC REPAIR SPECIALIST
DIAGRAM FOR PROGRESSION IN MOS 43M



*The 43M MOS caps out to the 57E MOS at skill level 5.

Digitized by Google

school, it must be learned through on-the-job training. To run a good training program, you must know where and how each critical task is taught.

Following chapter 3 are three appendixes that show:

- A list of all relevant and available MOS primary references by type (app A).
- A list of publications sources where these references may be obtained (app B).
- A list of all training aids and devices (app C).

TRAINING PROGRAM. You should use this trainer's guide with the various soldier's manuals and job books of your personnel to develop an individual training program for each person in MOS 43M. Since this guide contains all the critical tasks as well as references, school courses, and other training sources, it is your best guide in preparing your program. Some soldiers may be assigned to your unit as soon as they complete AIT. In this case, you must develop a plan for training (combining self-study and supervised OJT) that will help them to qualify at skill level 2. By referring to the individual soldier reports, job books, and ARTEP results, you will be able to locate 43M personnel who may lack training in certain areas. You must develop plans to supplement their training. Your evaluation of the 43M personnel together with their SQT scores determines whether a soldier is promoted. It is your responsibility as a commander to see that each soldier gets the best possible training. Your program should include the following:

a. *Job Books.* A job book for skill levels 1 and 2 has been produced to help you keep track of the training requirements for each soldier in MOS 43M. The job book is a firstline training record. It lists each critical task by duty position and skill level from the 43M soldier's manual. In this way, the job book aids the supervisor in keeping track of a soldier's ability to perform tasks by duty position. This information can be used to plan training time effectively. Although benefits may occur in using job books to prepare for the SQT, the main purpose of the job book is to evaluate and reinforce performance in each duty position of the MOS. Each job book page includes columns for entering the results of the supervisor's most recent evaluation of the soldier's performance of the task. This entry is provided on a "GO" or "NO-GO" basis with the date and initials of the evaluator. Each firstline supervisor keeps a separate job book for each soldier under him.

b. *Supervised On-The-Job Training (SOJT).* Each soldier should improve his skills while on the job; the best way is through the expertise of his supervisor. If you don't develop an effective SOJT program, you will penalize your troops when they take their next SQT.

YOUR RESPONSIBILITY. In addition to developing an individual training program, you must evaluate the performance of your personnel in all tasks included in the MOS. You must guide them in developing additional skills and make them familiar with the EPMS career ladder for MOS 43M.

a. *Evaluating.* Not all areas can be measured by the SQT, so you must prepare evaluations for your 43M personnel after they reach E5 and before they take the SQT. Your evaluation should take into account their attitude toward the Army and their job and how well they work with others. You should also consider their tact and initiative.

b. *Selection of Personnel for School Training.* Your personnel will be selected by higher headquarters to attend resident training courses. This means that your best people will be gone from your unit for a period of time. When they return they should be able to make even more significant contributions.

Digitized by Google

c. *Counseling.* EPMS makes sure that personal attention is given to each soldier's career. The way you counsel young soldiers is important because it helps determine their success in the Army. This places great demands on you, but it is part of being a supervisor in today's Army.

d. *Insuring Changes are Posted.* New and revised information for the soldier's manuals will be provided through the SQT Notice and JSC booklet. When these booklets arrive at the unit, insure that your soldiers study the changes.

CHANGES. The Quartermaster School would like your ideas on how to make the trainer's guide and soldier's manual better or easier to use. Send you comments on DA Form 2028 (Recommended Changes to Publications and Blank Forms) to the Commandant, US Army Quartermaster School, ATTN: ATSM-TDV-FS, Fort Lee, Virginia 23801. Make sure you state the page, paragraph, and line of the text in which a change is needed. If you don't have a form, you can send a letter to the above address.

EPMS HOTLINE

If you have any questions about EPMS, TELEPHONE:

Commercial -- 804-734-3767

Autovon -- 687-3767

When you dial 3767, you are dialing EPMS for the 14 Quartermaster MOSs. Someone at the other end of the line will answer your question. Or, if EPMS technical personnel are not available, your questions will be automatically recorded and you will receive your answer by telephone within a short while.
